A summary paragraph introducing a concept, explaining its importance or relevance, and providing an overview of the content that will be covered in the document (scope).

Typical wording to use is:

- This article explains the basics of {concept} and how it works in {the tool or context}.

{Then include a paragraph with a definition of the concept you are explaining. If more definitions are needed, include those definitions here as a bulleted list.}

{This section usually doesn't have a separate heading that explicitly says Definition; it can precede all the rest.}

Typical wordings to use are:

- {X} is;
- {X} represents
- {X} is connected to
- {X} are organized {describe the way how}
- {X} is similar to
- {X} addresses the common pain points of ...
- {X} solves the challenge of ...
- By implementing {X}, users can ...
- By using {X}, {specify users/target audience} gain ...
- To use {X}, you create {Y}

{Add visual aid to complement your explanations visually.}
